TABLE 2¹
HAZARDOUS WASTES/PERMITTED HAZARDOUS WASTE MANAGEMENT UNITS

WASTE TYPE	WASTE CODES ¹⁵	HAZARDOUS WASTE MANAGEMENT UNITS															
		INCINERATORS				MISC UNITS	TANK STORAGE TREATMENT					CONTAINER STORAGE					
		DFS	LIC	MPF		BRA SUB X	SDS	ACS	BRA	S-P ²	S-S ³	CHB	UPA	ECV	UPMC	TMA	S-2 ¹
	D002, D003, D004, D006, D007, D008, D009, D0010																
LIQUID MONITOR SUPPORT AND LAB WASTES	F999, D001, D002, F002, F003, F005																X
DFS CYCLONE RESIDUE	F999/P999/D003																X
ECR MAINTENANCE RESIDUE ¹⁶	P999 ¹⁵ , F999, D003	X		X													
INCINERATION RESIDUE	P999, F999, D005, D008																X

1. A list of the wastes that will be managed at this facility is shown in Attachment 2.
2. Sumps used as primary containment devices
3. Sumps used as secondary containment devices.
4. Rocket components include: Aluminum (warhead), Fiberglass (shipping and firing tube), Steel (rocket motor casing, fins etc.), Miscellaneous (paint, lacquer).
5. Includes munition body components other than rockets and mine bodies.
6. Includes drained bombs, spray tanks, and ton container.
7. Includes pre-filters and HEPA filters (from the ventilation system).
8. Includes steel pallet bands, parts/equipment, and nails.
9. Includes wood and wood preservatives as applied to pallets.
10. Includes agent contaminated debris, trash, baghouse debris, BRA salts, lightbulbs, demister candle packing, paint debris, ignitable wastes (aerosols, labpacks, isopropyl alcohol/glycol), batteries, refractory, slag, M40 canisters, MPF vacuum ash, spent cleaning solutions, scrap metal, piping, PAS solids, lamps, spent decon solution, sump sludge/solids, tap gear, paper, glass, plastics, demilitarization protective ensemble suit material, solid monitor support building and laboratory wastes that may include the following waste codes: D001-D011, D018, D019, D021, D022, D035, D039, D040, F001 through F005, U002, U003, U037, U044, U080, U131, U154, U159, U210, U220, F999, and P999. Refer to Module III for the list of waste codes that can be placed into a specific container storage area.
11. Reserved
12. Any abbreviations or acronyms found on this table which are not defined in these footnotes can be found in Appendix A.
13. Normally, the energetics (e.g., burster, explosives) will be removed from the projectiles/mortars in the ECRs before storage in the UPMC. However, if the burster detection systems, located at the Projectile Output Conveyor discharge stops in the UPMC, detect energetics, then the munitions with the detected energetics will be reloaded onto reject tables in the UPMC for storage.
14. The miscellaneous liquid wastes include agent contaminated hydraulic fluid, and lubricating oil
15. In addition to the waste codes listed in this table, additional waste codes may apply.
16. The ECR maintenance residues are identified in Attachment 2 (Waste Analysis Plan). The only ECR maintenance residues that can be fed to the MPF are unserviceable hand tools and metal hardware that are not contaminated with explosive residues (i.e., do not carry the D003 waste code).
17. Per Condition IV.E.6.
